

OVERVIEW
SIDE 1

CONTENTS

- Gameboard • 7 Dice • Deck of 42 Cards
- 5 Sets of Coloured Units
- 15 Cities • 5 Capitals • Parts sheet

GAMEBOARD
The gameboard is divided into 42 territories, which are grouped into continents: North America (yellow), South America (orange), Europe (blue), Africa (brown), Asia (green), and Australia (purple).
Some territories are adjacent to each other, meaning they either share a border or have a sea-line connecting them.

The territory of Brazil is adjacent to Venezuela, Peru and Argentina because they share borders. Brazil is also adjacent to North Africa because a sea-line connects them.

Indonesia, Eastern New Guinea, and Western Australia, together, these four are territories. Together, these four territories make up the continent of Australia.

CITIES

Cities will be placed on the board into different territories. If you control a territory that contains a city, you control that city. The number of cities you control is added to the number of territories you control when drafting troops, and they are also important to achieving some Objectives.

CAPITALS

Each player will have one capital placed in one of their territories. Capitals have no military function but are important to hold.
Capitals cannot be moved during game play.

TRAINING
SIDE 2

4 PLAYERS

Turn Order:
1 Yellow
2 Green
3 Blue
4 Red

Blue and Red start with one card each.

NO. = Amount of troops ■ = City ★ = Capital

5 PLAYERS

Turn Order:
1 Yellow
2 Green
3 Blue
4 Red
5 Black

Blue and Red start with one card each.
Black starts with two cards.

ATTENTION!

- The number of troops you draft at the start of your turn is a sum of the following:
- 1 The number of territories and cities you control divided by 3
 - 2 Any continent bonus(es)
 - 3 The number of capitals you control
 - 4 Troops gained from handing in cards

TERRITORIES AND CITIES

Count the number of territories and cities you control and divide this number by 3 (ignore any remainder). If this number is lower than 3, round it up to 3. Draft that many troops and put them in front of you.

CONTINENT BONUS(ES)

If you control every territory within the continent, then you control the continent. The chart next to the continent shows how many troops you draft. Draft these troops and add them to the pile in front of you.

If you control Africa you draft 3 bonus troops.

TERRITORIES AND CITIES

Green controls 13 territories and cities at the start of his turn. 13 divided by 3 is 4. Green drafts 4 troops.

Blue controls 5 territories and no cities at the start of his turn. 5 divided by 3 is 1. However, you never draft fewer than 3 troops, so Blue drafts 3.

CONTINENTS

Red controls Australia. In addition to the troops she drafted from her territories and cities, Red also drafts 2 troops for controlling Australia.

Yellow controls Europe and Africa. In addition to the troops he drafted from his territories and cities, Yellow drafts 8 troops for controlling these two continents (5 for Europe and 3 for Africa).

ATTACKING
SIDE 2

If the defender still has troops in the territory:

You may attack again if you like and are able, either between the same territories or between new ones.

If the defender has no more troops in the territory:

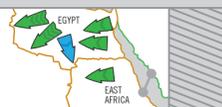

Move the attacking troops into the territory. You may also move in additional troops from the attacking territory. So even though you can only attack with 3 troops, you can move more than that into a conquered territory. Remember you must leave at least 1 troop behind – no territory can ever be left abandoned.

If the conquered territory has an enemy capital, leave the capital in the territory.

You may attack another territory again if you like and are able.

ELIMINATING ANOTHER PLAYER

You eliminate another player if you defeat his/her last troop on the board. This player is now out of the game. As a reward, you get all of that player's cards (if he/she has any). Add these to your hand. Leave the defeated player's capital on the board.

Green attacks Blue's 1 defending troop in Egypt from East Africa, sending in 3 troops. Green wins the battle and moves his 3 attacking troops into Egypt. He then moves 5 additional troops from East Africa into Egypt. He must leave at least 1 troop behind.

OBJECTIVES
SIDE 1

HOW TO COLLECT OBJECTIVES

After you finish attacking, look at the Objectives that are face up on the board. If you have achieved one of these during your turn, you may discard a card from your hand, and take that Objective and place it in front of you. Do not put a new Objective on the board. As the game goes on, fewer Objectives will be available.

If you are eligible for more than one Objective on your turn, you choose one – a player can only collect one Objective on a turn.
Once an Objective is achieved, it does not change hands unless a player is eliminated. If you eliminate another player you take that player's Objectives in addition to any cards that player had.

MINOR OBJECTIVES

CONTROL EUROPE Control all 7 territories in Europe.	CONTROL NORTH AMERICA Control all 9 territories in North America.	CONTROL ASIA Control all 12 territories in Asia.	CONTROL 8 CITIES Control at least 8 cities. These can be anywhere on the board.	CONTROL AN ENEMY CAPITAL Control at least 1 enemy capital. You do not need to be in control of your own capital.	TAKE OVER 4 CITIES IN 1 TURN Take control of at least 4 cities that you did not control at the start of the turn.
---	---	--	---	--	---

MAJOR OBJECTIVES

TAKE OVER 10 TERRITORIES IN 1 TURN Take control of at least 10 territories that you did not control at the start of the turn.	CONTROL 2 ENEMY CAPITALS Control at least 2 enemy capitals. You do not need to be in control of your own capital.	CONTROL 18 TERRITORIES Control at least 18 territories anywhere on the board.	CONTROL 2 COMPLETE CONTINENTS Control every territory on 2 different continents.	TAKE OVER AN ENTIRE CONTINENT IN 1 TURN Take control of a continent where you did not control any territory at the start of the turn.	CONTROL 11 CITIES Control at least 11 cities. These can be anywhere on the board.
---	---	---	--	---	---

Private - Your orders are outlined on the folder to the left. For further details, refer to these Reference Cards - separate them and flip them over to see the fronts.

ENDING YOUR TURN

ATTENTION!

- At the end of your turn, you do two things:
- Manoeuvre Troops.
 - Draw a Card (maybe).

MANOEUVRE TROOPS

Manoeuvring troops is optional. Take as many troops as you'd like from **one** of your territories and move them to **one** other connected territory. (Remember to leave at least one troop behind – you cannot abandon a territory.) Territories are “connected” if all of the territories in between are also controlled by you. You cannot pass through enemy territories. This is not an attack; it is simply a movement from one of your territories to another in order to protect your front line or to get into position for your next turn.

At the end of your turn, you can manoeuvre troops from Indonesia through Southeast Asia, through India, through Afghanistan, and into Russia since you control all of these territories. Since you only went through your own territories, Indonesia and Russia are “connected.”

DRAW A CARD

If you conquered at least 1 enemy territory on your turn, then you get 1 card. Draw it off the top of the deck and add it to your hand. It doesn't matter whether you conquered 1 territory or 40 territories, you only get 1 card.

If you collect an Objective, you cannot also draw a card that turn.

If there are no more cards in the deck, shuffle the discard pile to make a new deck.

OBJECTIVES SIDE 2

REWARDS (Command Room)

In the Command Room version of the game, collecting an Objective lets you also collect the reward on top of it. Unless otherwise stated, put the reward in front of you to remind you of your Reward. If you eliminate another player you do not get that player's Rewards. Those are eliminated with the player.

MINOR REWARDS

Airfield: Take the Airfield token and immediately place it onto any territory you control. As long as you have your Airfield, you add 1 to your highest die roll for any battle waged in that territory or in any adjacent territory. This works on attack and defence. If you lose control of the territory containing the Airfield, then the Airfield is destroyed (but you still keep the Objective it came with). If you place two Airfields so that they affect the same territory, you may only get the benefit from one Airfield.

Starting Manoeuvre: You get a troop manoeuvre at the start of your turn, after you've placed troops but before you make your first attack.

Additional Manoeuvre: You get an additional troop manoeuvre during your manoeuvre phase.

Guaranteed Card: You are guaranteed 1 card at the end of your turn, whether you conquer a territory or not, or if you take an Objective.

MAJOR REWARDS

Airfield: This Airfield works the same as the Minor Reward Airfield.

Attack Die: Take the bonus attack die. When attacking, you now roll the bonus attack die in addition to the normal black dice. After rolling, replace the lowest black die with the bonus attack die (unless the bonus attack die is the lowest) and re-order the dice as necessary.

Defence Die: Take the bonus defence die. When defending, you now roll the bonus defence die in addition to the normal red dice. After rolling, replace the lowest red die with the bonus defence die (unless the bonus defence die is the lowest) and re-order the dice as necessary.

2 Troops: You get 2 additional troops every turn when drafting.

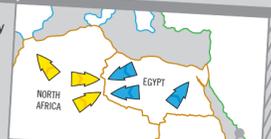

ATTACKING SIDE 1

ATTENTION!

If you are familiar with older versions of the game of RISK, you may skip this part - How To Attack hasn't changed.

ATTACKING

- On your turn, you can attack adjacent enemy territories in an attempt to take them over. Attacking is optional.
 - Choose one of your territories that contains at least 2 troops. Select 1 troop to “stay behind” and guard your territory. The remaining troop(s) can attack the enemy territory.
 - Choose how many troops will attack. You can send in 1, 2, or 3. Your territory may contain more than 3 troops, but no more than 3 can attack.
 - The defender chooses how many troops will defend – 1 or 2 troops.
 - Each side rolls 1 die for each troop in the battle. This means the attacker rolls 1, 2, or 3 dice and the defender rolls 1 or 2 dice.
 - Both sides put their dice in order from highest to lowest. Compare your highest die to your opponent's highest die. The higher number wins, and the defender wins ties.
 - The loser removes a troop from the territory.
 - Compare your second highest dice. The loser removes 1 troop.
- If there is no die to compare yours to, meaning you rolled 1 or 2 more dice than your opponent, then ignore that die/dice.

Yellow has 3 troops in North Africa and wants to attack Egypt. He sends 2 troops into Egypt. He cannot send all 3 since one troop must stay behind.

Blue is defending Egypt and has 3 troops. He can only send 2 out to battle.

Green has 10 troops in East Africa and sends 3 troops to attack Egypt. (Green cannot send more than this, since a maximum of 3 troops can attack at a time.) Blue defends with 2 troops.

Green rolls three dice, one for each attacking troop, and Blue defends with 2 dice. Green's highest die, a 6, is higher than Blue's highest die, a 5. Blue removes a defending troop. Blue and Green's second-highest dice are a tie. Since defenders win ties, Green removes an attacking troop. Green's last die, a 3, is not used since there is no defending die to compare it to.

TROOPS SIDE 2

CAPITALS

Draft one troop for every capital you control, including your own. Add these troops to the pile in front of you.

CARDS

How you get cards is explained on the Ending Your Turn Card. Cards have 1 or 2 stars. If you have cards containing 2 or more stars you may choose to hand in some or all of them to draft troops. The number of stars determines how many troops you get. You may hand in 2 to 10 stars. Refer to the chart on the board to see how many troops you get for a set of cards. Add these troops to the pile in front of you. The territories on the cards are irrelevant when drafting troops.

Red has 3 cards containing 4 stars at the start of her turn. She hands in all 3 to draft 7 troops.

★	★	★	★
2	2	5	10
3	4	6	13
4	7	7	17
		8	21
		9	25
		10	30

AFTER DRAFTING

After drafting your troops, place ALL of them into territories that you control. You can choose to put all of these troops into one territory or spread them out across your territories.

TRAINING SIDE 1

PLACE OBJECTIVES

Place these Minor Objectives on the board:

- Control 8 Cities
- Control North America
- Control Europe
- Control Asia

Place these Major Objectives on the board:

- Take Over 10 Territories in One Turn
- Control 2 Enemy Capitals
- Control 18 Territories
- Control 2 Complete Continents

The remaining Objectives go back in the box – they will not be used in this game.

PLACE CITIES

Place cities in the following territories:

- Western United States
- Ontario
- Eastern United States
- Brazil
- Great Britain
- Northern Europe
- Western Europe
- Southern Europe
- Russia
- Egypt
- South Africa
- India
- China
- Japan
- Eastern Australia

ATTENTION!

Set up the board as shown in the appropriate chart: (3 player, 4 player, or 5 player)

3 PLAYERS

Turn Order:
1 Yellow
2 Green
3 Blue

Blue starts with one card.

10 = Amount of troops
City = City
★ = Capital

OVERVIEW SIDE 2

TROOPS

Every player will control troops of one colour. Troops are represented by two different arrows – the smaller arrow represents 1 troop, and the larger arrow represents 3 troops.

In Eastern United States, Green has 2 small arrows (1 troop each) and 1 large arrow (3 troops) for a total of 5 troops.

DICE

You use the dice when attacking and defending territories.

CARDS

There is one card for each territory on the board. Each card has the name and picture of a territory, and 1 or 2 stars.

OBJECTIVES

Objectives are military goals that players will try to achieve.

REWARDS

Rewards are linked to Objectives, once achieved, they give a bonus to your troops. Rewards are used only in the Command Room version of the game.
