5. What happens when…?

I roll a double

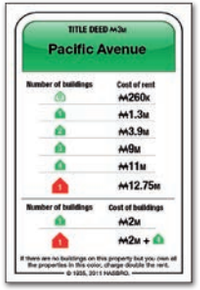
If you roll a **double**, do steps 2 & 3 from On Your Turn, then roll again. **But watch out!** If you roll doubles **3 times** on the same turn, you **Go to Jail**.

I buy a property

Pay the bank the amount shown on the space. Put the property card faceup in front of you so everyone can see it.

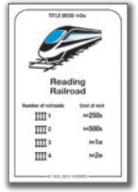
I land on another player's property

Pay them rent. For example, if you land on Pacific Avenue and the owner has 0 houses there, pay them ₩260K. If they have 1 house there, pay them ₩1.3M.



If the owner has no houses but has all the properties of that color, pay DOUBLE the rent for 0 buildings. You don't pay rent on mortgaged properties.

Railroads: pay rent depending on how many railroads the owner owns.



Utilities: If the owner owns only one utility, roll **one** die again and pay them ₩100K × your die roll e.g. if you roll 5, pay ₩500K. If they own **both** utilities, roll both dice and pay them ₩100K × your dice roll.

If someone lands on your property, it's up to **you** to ask for rent **before** the next person rolls the dice. You snooze, you lose!

There is an auction

If you decide not to buy an unowned property when you land on it, use the app to auction it off.

I buy a house

- When you own ALL the properties in a color group you can build houses on your turn or between other players' turns. Ask to use the app and buy the house/s. Building prices are shown on the property card.
- Each property in the group must have a house on it before you can build a second house on any of them. Always build evenly.
- Once you have 4 houses on a property, you can buy a hotel. Pay the hotel price shown on the property card, put the 4 houses back on the building pile and replace them with a hotel. No other buildings can now be added.
- You can't build on railroads or utilities.
- Building shortage? If buildings are limited and two or more players want to buy them, auction them off to the highest bidder! If there are no buildings left, you'll just have to wait until someone sells theirs.

I want to do a deal with another player

You can deal cash, properties or a combination of both. First, sell any buildings on that property back to the bank (see below). If you're selling for cash, get your buyer to pay you by pressing PAY PLAYER on **their** Action Menu.

You can **buy or sell mortgaged properties** at any price you agree with another player.

After you buy a mortgaged property from another player, you can leave it mortgaged (blue side up) or repay the mortgage.

I'm in debt

- **sell houses** back to the bank at **half** the price you paid for them. Sell them one at a time across the properties in a color group, in the same way you bought them.
- **sell hotels** at **half** the price you paid for them. You get 4 houses in return for each hotel you sell.

- **mortgage a property.** Sell any buildings on that property first. Turn the property card blue side up, then tap Mortgage. You still own that property, but you can't collect rent on it until you pay off the mortgage.

- **sell properties to another player.** You can sell for cash, properties or a combination of both (see above).

I want to repay a mortgage

Pay the "unmortgage for" value on the blue side of the card. Turn the property card blue side down. You can collect rent when another player lands there or build houses (if you own the full color group).

I am sent to jail

Move your token to jail if:

- you land on Go To Jail
- a Chance or Community Chest card sends you there
- you roll 3 doubles in a row.

Go directly to Jail, do not pass GO, do not collect ₩2M – your turn is over.

On your next turn, tap GET OUT OF JAIL to plan your escape! Failed to escape 3 turns in a row? Pay immediately to get out.

I am bankrupt!

Can't raise enough money to pay your debts? You're bankrupt and the game is over. Tap BANKRUPT to finish the game and find out who the winner is!

- If you owe another player, you'll have to give them all your money and property cards. Keep the cards in their mortgaged/unmortgaged state. You don't get any money for them.
- If you owe the bank, put all your property cards back at the side of the board. The bank now owns these.
- At the end of the game the app will ask who owns what. For the unowned properties, choose the bank.
