**For best results apply graffix on smooth, flat surface. Recommended for use on glass, smooth laminated surfaces, smooth fiberglass, and smooth painted surface.**

1. **Prior to application, clean and dry application surfaces.**
2. **Peel graffix off backing (save backing in order to reuse graffix).**
3. **Slowly apply graffix to surface to avoid air pockets.**
4. **For best results, remove and reapply graffix every 6 months.**
5. **In case residue is left on surface, remove with water and damp cloth.**

***Don't leave graffix in one area longer than 6 months to help prevent damage to wallpaper.***
