TESTING THE BATTERIES

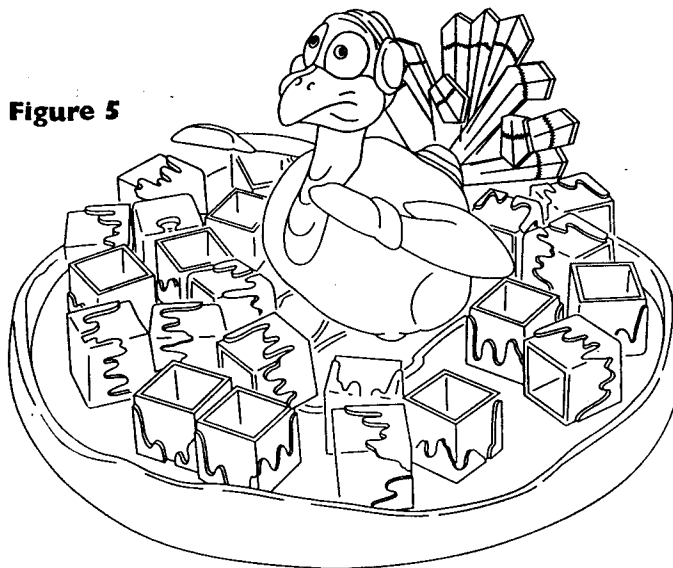

After you install the batteries and apply the foot labels, slide the battery door back onto Freezin' Freddy. Then, carefully press Freezin' Freddy's tail feathers to the ON position as shown in Figure 2. He should start shaking. If he doesn't shake, the batteries may be weak or improperly installed. After testing the batteries, pull the tail feathers to the OFF position.

Caution: Batteries may leak if improperly installed. Remove batteries during extended storage. Never mix battery types.

SETUP

1. Place the "frozen pond" on a hard, flat surface within easy reach of all players.
2. Place Freezin' Freddy in the center of the pond.
3. Each player chooses a different color ice cube tray.
4. Mix up *all* the ice cubes and place them randomly on the pond as shown in Figure 5. (Even with two or three players, *all* cubes should still be placed in the pond.)

OBJECT OF THE GAME

Be first to fill your tray with all six of your color ice cubes.

HOW TO PLAY

1. Press Freezin' Freddy's tail feathers to the ON position. As Freddy shivers and shakes and moves around the ice, he will kick ice cubes out of the pond.
2. You and your friends (all at the same time) try to quickly pick up any cube (or cubes) kicked out of the pond and then do the following:
 - Put your color cube(s) into your tray and continue playing.
 - Toss other players' cubes back into the pond (to keep your opponents from getting them) and continue playing.
3. The game continues as described above, with all players grabbing ice cubes, keeping their own and tossing the others back onto the pond. Play continues until someone fills up his or her tray. That player should immediately turn off Freddy.

Grabbing Cubes — Remember, two or more players may try to grab the same cube, but that's part of the fun! You've got to grab fastest to win!
