

DOMINOES INSTRUCTIONS

2 to 4 Players

Contents: Tent piece, 29 Dominoes

Object: Be the first player to finish your row of dominoes by placing your Quasimodo domino!

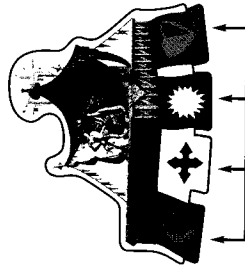

THE FIRST TIME YOU PLAY

Carefully punch out the 29 dominoes and tent piece from the cardboard sheets. Discard waste.

SETUP

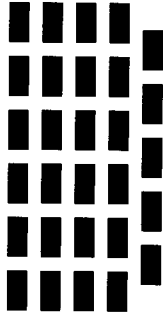

The domino rows can grow to almost three feet in length, so find a large, flat surface to play on.

Find the tent piece to start the game (see right). Place it faceup within easy reach of all players. Players will build rows of dominoes off the colored banners.

Each player will build a row off one colored banner.

Turn the dominoes facedown and mix them up. Then arrange them in rows, like this:

TIME TO PLAY!

Oldest player goes first. Play continues clockwise (to the left).

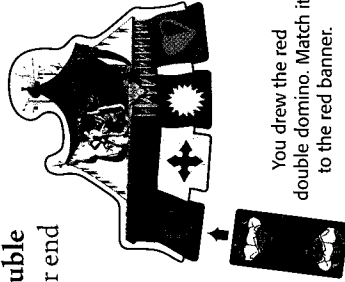

Start with a Double Domino

Each player must start his or her row with a double domino (a domino showing two of the same color and character). If you're the starting player, turn any domino faceup. Let the other players see it.

♦ **If You Don't Turn Over a Double Domino,** turn the domino facedown again in the same spot. Your turn is over.

♦ **If You Turn Over a Double**

Domino, connect either end to the banner with the matching color background. This is the row you must build for the rest of the game. Now turn over another domino to try to build your row.

You drew the red double domino. Match it to the red banner.

Build Your Row

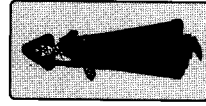

After placing your double domino, build your row by finding dominoes matching both the *character* shown and the *color* of the background.

♦ **If You Don't Have a Match,** turn the domino facedown again in the same spot. Your turn is over. If you turn over Frolo, see *The Frolo Domino*, below.

♦ **If You Have a Match,** place that domino against the matching domino so that the matching ends meet.

Now turn over another domino. Keep going until you don't make a match!

You drew a red Esmeralda. Match the domino ends.

The Frolo Domino

If you turn over the Frolo domino, too bad! Take your last domino placed and put it back (facedown) with the other dominoes in *any* open space. Turn the Frolo domino facedown again in the same spot. Your turn is over.

CONTINUE PLAYING!

The game continues with each player trying to match dominoes end-to-end.

HOW TO WIN!

Be first to place your Quasimodo domino at the end of your row, and you win the game!
