

# GETTING STARTED QUICK!

## Quick Play:

We have provided the following Quick Play instructions for those players who want to play Lights Out now and catch up on instruction details later. You can use this as a quick reference anytime you play! Now let's turn the Lights Out!

## Object:

To turn all the lights out on the keypad, but each time you press a lit or unlit button, it not only changes that button, but also the adjacent buttons! You must try to turn the lights out in the minimum number of moves!

## Game:

Lights Out contains three different game play modes, but for purposes of the Quick Start play, we will begin with Mode 1, Puzzle 1! Your game contains an On/Off button, a Start button, a Sound Button, a Help Button and a Select Button.

## How To Play:

Press the "On" Button - This will turn your game on. You will see a "show of lights" chase around the board, ending in a cross pattern.

Press the "Start" Button - The first button in the top row (row 1) will flash and then you will see three buttons in the middle row (row 3) light up and stay lit. This is Mode 1, Puzzle 1. Now you must try to turn these lights out!

1	2	3	4	5	Row 1
6	7	8	9	10	Row 2
11	12	13	14	15	Row 3
16	17	18	19	20	Row 4
21	22	23	24	25	Row 5

## SOLVING PUZZLE 1:

*Step 1: Following the diagram, buttons 11, 13 and 15 are lit. Press button 16. This shuts off button 11, but turns on buttons 17 and 21, while buttons 13 and 15 stayed the same.*

*Step 2: Press button 18. Now buttons 18, 19 and 23 are lit. Buttons 13 and 17 have turned off and buttons 15, 16 and 21 stayed the same.*

*Step 3: Press button 20. Now buttons 20 and 25 are lit. Buttons 15 and 19 have turned off and buttons 16, 18, 21 and 23 remained lit.*

*Step 4: Press button 21. Now button 22 is lit. Button 16 and 21 shut off, 18, 20, 23 and 25 remained the same.*

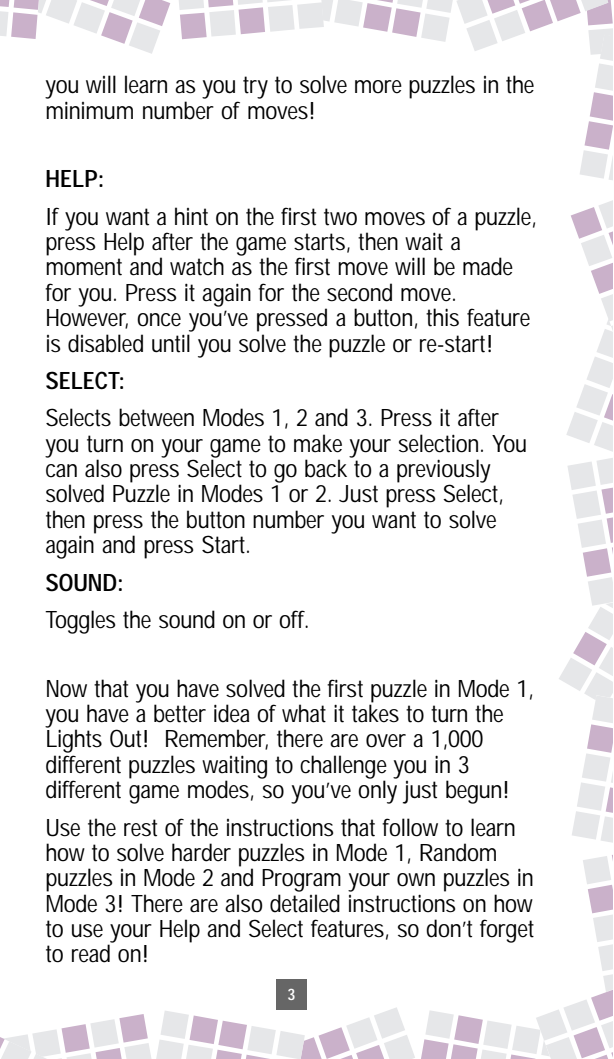

*Step 5: Press button 23. Now buttons 20, 24 and 25 are lit. Now you have three lights to go!*

*\*\*Note - you will notice that the buttons are "moving to the right side of the keypad. This is a good strategy to follow as you "corner" the lights so they are in a better position to be shut off!*

*Step 6: Your final move! Press button 25. Congratulations! You've turned the lights out in only 6 moves! You should see another "show of lights" chasing around the display - now you can move onto puzzle 2 in Mode 1!*

As you solved this first puzzle, you can see the effect the touch of a lit and unlit button has on the rest of the keypad. Touching a button that is lit will turn it off. Touching a button that is unlit will turn it on. But the touch of a button, whether on or off, also will change the lights directly above, below or next to the button you press! This is the strategy

you will learn as you try to solve more puzzles in the minimum number of moves!

### **HELP:**

If you want a hint on the first two moves of a puzzle, press Help after the game starts, then wait a moment and watch as the first move will be made for you. Press it again for the second move. However, once you've pressed a button, this feature is disabled until you solve the puzzle or re-start!

### **SELECT:**

Selects between Modes 1, 2 and 3. Press it after you turn on your game to make your selection. You can also press Select to go back to a previously solved Puzzle in Modes 1 or 2. Just press Select, then press the button number you want to solve again and press Start.

### **SOUND:**

Toggles the sound on or off.

Now that you have solved the first puzzle in Mode 1, you have a better idea of what it takes to turn the Lights Out! Remember, there are over a 1,000 different puzzles waiting to challenge you in 3 different game modes, so you've only just begun!

Use the rest of the instructions that follow to learn how to solve harder puzzles in Mode 1, Random puzzles in Mode 2 and Program your own puzzles in Mode 3! There are also detailed instructions on how to use your Help and Select features, so don't forget to read on!

# I NTRODUCTION

You are holding in your hands the most addictive, brain boggling puzzle ever created. The object of the puzzle is simple...turn the LIGHTS OUT. It seems so easy...at first. The problem is that every press of a button has an effect on the puzzle. Lights that are on will shut off, and "off" lights will turn on. (So, if you touch a button that is lit, it will shut off. Conversely, touching an unlit button will cause it to light up). Moreover, when you touch a button, it not only changes that light, but it also changes the adjacent lights (those that are directly above, below, or next to the pressed button). Every pre-programmed puzzle has a solution. Your goal is to solve each puzzle in the fewest number of "moves", or steps.

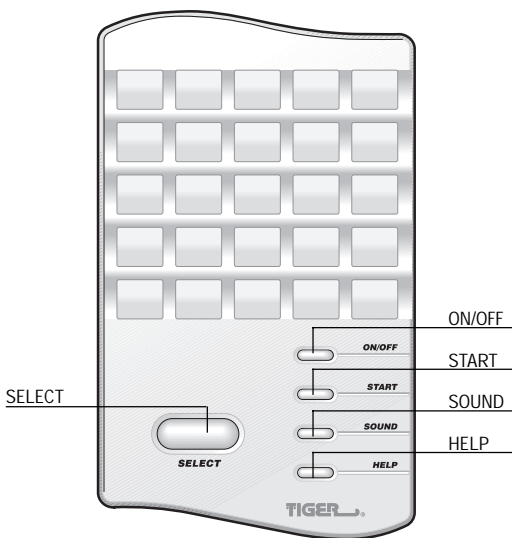

The first puzzles are simple, to help you get a feel for the game, and get the basic "logic" of LIGHTS OUT. Later puzzles get progressively more challenging, requiring a little more brain power to solve. Once you start to solve some of the 50 puzzles in MODE 1, you can try your hand at MODE 2, which features over 1000 randomly selected puzzles...or for a real mind-melter, take on MODE 3, and create and solve your own puzzles.

LIGHTS OUT is so addictive, you may not be able to put it down, but, if you should shut it off for any reason, the memory function will keep track of your progress, and let you play from the last puzzle solved.

What follows is a basic guide to the game and its functions, and a "walk through" of the first puzzle. So get to work...its time to turn the LIGHTS OUT!

# THE GAME

Before you get started, you may want to become accustomed to the different buttons and features on your LIGHTS OUT game.

LIGHTS OUT has 3 different GAME MODES of play. The goal in all 3 MODES is the same, but each one provides a different challenge, and beginning players will probably want to start with MODE 1.

**MODE 1** - 50 pre-programmed puzzles, each progressively more difficult.

**MODE 2** - Over 1000 randomly selected puzzles. Can you solve them all?

**MODE 3** - Create your own puzzles, and try them out on a friend!

**ON/OFF** : Turns the game ON or OFF. Your LIGHTS OUT game will shut off automatically after 3 minutes of non-play.

**START** : a) Starts each game.  
b) Confirms a selected puzzle (MODE 1 and 2).  
c) Confirms an input puzzle (MODE 3).  
d) Restarts the puzzle (regardless of how many "moves" have been made).

**SELECT** : a) Selects between MODES 1, 2, or 3.  
b) Exits the current puzzle (and advances to next mode).  
c) Selects a previously solved puzzle (MODES 1 and 2).

**SOUND** : Toggles the sound ON and OFF.

**HELP** : Receive "hints" from the computer (MODES 1 and 2). The HELP button will give you the first two moves of a puzzle, one move with each press. However, once a player has pressed a button, this feature is disabled until the puzzle is solved or re-started.

## PLAYING THE GAME

**PRESS THE "ON" BUTTON** to turn on the unit. You will now see a pattern of lights chasing around the board. This is followed by the appearance of the cross pattern. This pattern is a representation of what would happen if you pressed the center button while all of the lights were off on the game. As you can see, the center button is lit, as are the 4 surrounding buttons.

**PRESS THE "START" BUTTON** If this is your first time playing LIGHTS OUT, three buttons in row three will light.... This is Puzzle 1 (Mode 1).

To understand the solution to a puzzle, think of the LIGHTS OUT puzzle display in terms of numbers. Each button (or light) on the puzzle can be assigned a number from 1 to 25 (see adjacent illustration)

1	2	3	4	5	Row 1
6	7	8	9	10	Row 2
11	12	13	14	15	Row 3
16	17	18	19	20	Row 4
21	22	23	24	25	Row 5

For Puzzle 1 (Mode 1), you should see button numbers 11, 13, and 15 lit up on your display.

Since your goal is to shut off the lights in the fewest moves possible, you will need to decide which buttons to press. Remember, each button press effects the surrounding buttons, so plan your moves carefully. For example, if button 12 is pressed, the lights on buttons 11 and 13 will be shut off, but now buttons 7, 12, and 17 will be turned on. Follow the illustrations on the next page, and try it out on the actual game to understand how to recognize certain patterns.

# SOLVING PUZZLE 1

Follow the steps below to solve this puzzle in 6 steps - the minimum number of moves!

**STEP 1** When you start, buttons 11, 13, and 15 will be lit. Press button 16.

Pressing button 16 caused button 11 to shut off, and the lights next to and below it, 17 and 21, to turn on. Buttons 13 and 15 stayed the same.

**STEP 2** Button 11 is now off, but 13, 15, 16, 17 and 21 are lit.

Press button 18.

Buttons 18, 19 and 23 are will turn on. Buttons 13 and 17 will turn off and buttons 15, 16 and 21 stay the same.

**STEP 3** Buttons 15, 16, 18, 19, 21 and 23 are lit.

Press button 20.

Now buttons 15 & 19 have shut off. Buttons 20 and 25 are now lit, and button 16, 18, 21 and 23 remained the same.

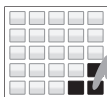

**STEP 4** Press button 21.

Now button 22 is lit. Button 16 and 21 shut off, and button 18, 20, 23 and 25 remained the same. You notice that there is a general "movement" of buttons to the right side of the game board. This is a good strategy to follow - to "corner" the lights so they are in a better position to be shut off.

**STEP 5** Press button 23.

Now buttons 20, 24 and 25 are lit. Now you have three lights to go.

**STEP 6** This is your final move. The only lights on the board are 20, 24 and 25.

Press button 25.

All the lights have gone out and you have turned the Lights Out in the minimum number of moves! You should see a "victory" pattern of lights chasing around the entire display - Now you can move on to puzzle 2!

After a puzzle has been solved in MODE 1, you can try to improve your solution by accessing that puzzle again in MODE 1 by using the SELECT button. Simply press SELECT at any time during a puzzle (this turns all the lights out), then press the button number of the puzzle you want to choose, followed by the START button.

*Note - You cannot select a puzzle number higher than the last puzzle you were working on. For example, if the last puzzle you complete is number 12 in MODE 1, you cannot select puzzle 14 until you solve 13 first!*

Remember, if necessary, you can always shut off the game and it will return you to the beginning of the last puzzle you were working on when you're ready to play again! Your Lights Out game will shut-off automatically after 3 minutes of non-play.

## **T**HE HELP FEATURE

If you seem to be stuck on a puzzle, this is a good way to get you back on the right track. The Help feature can be used in MODES 1 and 2 on puzzles requiring 10 moves or less (in MODE 1, these are puzzles 1-25). When you start a puzzle, you can either jump right in, or press the HELP button for advice. The computer will show you the best possible move to make, and then automatically make that move for you. Press it again to see the most logical second step. The computer will only show you the first two moves, and then you'll need to proceed on your own. Remember, this help

feature can only be used at the beginning of a puzzle, and can't be used at all in the more advanced (11 steps or higher) puzzles!

## **T**HE SAVE FEATURE

As we mentioned, you can shut off the game and return to the “current” puzzle at any point. There are a few exceptions, however. This save feature will not work in MODE 3 with the player-created puzzles, and the game will be re-set when the batteries are removed for replacement.

## **S**ELECTING PUZZLE MODES

Now that you have solved Puzzle 1 in Mode 1, it is time to learn how to access each of the three different Puzzle Modes in Lights Out.

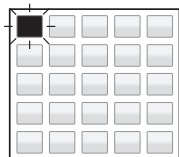

### **MODE 1**

After turning Lights Out on, pressing the start button automatically defaults you to the last puzzle you tried to solve in Mode 1.

Mode 1 enables you to solve 50 pre-programmed puzzles, each one more difficult from the last. Solving a beginning puzzle can be as few as 6 steps, while the more advanced puzzles could require up to 15 steps! For the first 25 pre-programmed puzzles, only one blinking light will appear. (Refer to diagram on the next page)

PUZZLE	MINIMUM STEPS	ROW
Puzzles 1-5	6 steps	1
Puzzles 6-10	7 steps	2
Puzzles 11-15	8 steps	3
Puzzles 16-20	9 steps	4
Puzzles 21-25	10 steps	5

*This Lights Out diagram indicates you are on puzzle 1 in Mode 1 which should require 6 steps to solve!*

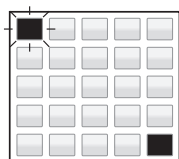

Row 1  
Row 2  
Row 3  
Row 4  
Row 5

Once you have mastered the first 25 puzzles in Mode 1, only then can you proceed to puzzles 26-50. These puzzles will be indicated by two lights, a blinking light and a light in the lower right corner of the game board that always stays lit.

PUZZLE	MINIMUM STEPS	ROW
Puzzles 26-30	11 steps	1
Puzzles 31-35	12 steps	2
Puzzles 36-40	13 steps	3
Puzzles 41-45	14 steps	4
Puzzles 46-50	15 steps	5

*This Lights Out diagram indicates you are on puzzle 26 in Mode 1 which should require 11 steps to solve!*

Row 1  
Row 2  
Row 3  
Row 4  
Row 5

Similar to the method for the first 25 puzzles, you can tell how many moves are required for the more advanced puzzles 26-50.

## REMEMBER

The challenge of Lights Out is to solve a puzzle in the minimum number of moves required. When you solve a puzzle in the minimum number of moves, you will be rewarded with a blinking light show chasing around the entire display. Lights Out will then automatically display the next puzzle! If you go over the minimum number of moves, the number of moves you exceed by will flash on your display, but you can still proceed to the next puzzle as long as you do not exceed 10 moves! For example, solving a 6 step puzzle in 8 steps will display two blinking lights! If you solve a puzzle in more than 10 steps over the minimum number of moves, a lighted "X" will appear on screen and you will have to try again before advancing to the next puzzle!

## MODE 2

MODE 2 is similar to MODE 1, except that all the puzzles are randomly generated by the computer. You will be able to tell how many moves are required to solve a puzzle right before the puzzle appears as you did in MODE 1 (see previous charts).

*NOTE: when you access MODE 2, the default game, or first game in MODE 2, will be the same puzzle level you achieved in MODE 1. So, if the last puzzle you are working on in MODE 1 is an eight step puzzle, you will start off with eight step puzzles in MODE 2.*

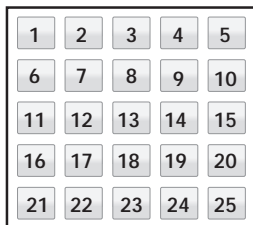

In Mode 2, you can go back to any puzzle level up to the last puzzle level you achieved in Mode 1, by

simply pressing the select button at any time, then pressing the button number of the puzzle you want to choose, followed by the start button.

## MODE 3

You could call this "Lights In", since you are now given the chance to input your own puzzles to challenge yourself and your friends! Of course, you have to figure out how to solve them too, so don't try to get too tricky! When you select MODE 3 with the SELECT button and push "Start", you are able to press as many of the buttons on the keypad as you like. Each time a button is pressed once, it will light up. When you have finished creating, press start again to begin your puzzle.

*Note: it is possible to create a puzzle that is so difficult, it may not have an answer! That is why we have provided 1,000 puzzles for you to program and try to solve. The following pages will list these puzzles by the minimum number of moves it takes to solve them, starting with 6 step puzzles. Simply push the buttons listed for each puzzle and then press the Start button to challenge yourself and your friends!*

# I NSERTING THE BATTERIES

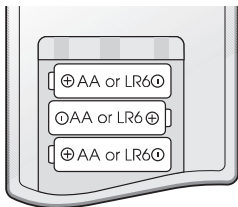

To insert the batteries, have an adult open the battery compartment cover at the back of the game. (To remove cover, push in direction of the arrow.) Insert three "AA" batteries, UM-3, LR6 or equivalent (not included), making sure to align "+" and "-" as shown. To ensure proper function, do not mix alkaline batteries with standard batteries or rechargeable batteries.

Do not mix old and new batteries.

Do not use rechargeable batteries.

Replace with new batteries at the first sign of erratic operation.

Remember, your game will reset to the first puzzle level (Modes 1 and 2) once you're replaced or removed the batteries!

# D ETECT & DAMAGE

If a part of your Lights Out is damaged or something has been left out, DO NOT RETURN THE GAME TO THE STORE. The store doesn't have replacement parts. Instead, write to us at:

**TIGER ELECTRONIC TOYS, REPAIR CENTER**  
980 Woodlands Parkway, Vernon Hills,  
Illinois 60061, U.S.A.

Please include a note with your return explaining the problem along with a sales slip, date, place of purchase and price paid. We will do our best to expedite your return promptly.

# 90 DAY LIMITED WARRANTY

Tiger Electronic Toys warrants to the original consumer purchaser of any Lights Out that the product will be free of defects in material or workmanship for 90 days from date of purchase.

During this 90-day warranty period Lights Out will either be repaired or it will be replaced (at our option) without charge to the purchaser, when returned either to the dealer with proof of the date of purchase, or when returned prepaid and insured with proof of date of purchase, to

## **TIGER ELECTRONIC TOYS, REPAIR CENTER**

**980 Woodlands Parkway, Vernon Hills, Illinois 60061, USA.**

Units returned without proof of the date of purchase, or units returned after the 90-day warranty period has expired, will be repaired or replaced (at our option) for a service charge of US\$12.50. Payment must be made by check or money order. This non-warranty service will only be available for one year from the date of purchase. All non-warranty units must be returned postage paid and insured to

## **TIGER ELECTRONIC TOYS, REPAIR CENTER**

**980 Woodlands Parkway, Vernon Hills, Illinois 60061, USA.**

Tiger Electronic Toys will not be liable for loss or mis-use of the product or other incidental or consequential costs, expenses, or damages incurred by the purchaser. Any implied warranties are limited in duration to the 90-day period from the original date of purchase.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state so the foregoing limitations may not apply to you. This warranty does not cover damage resulting from accident, unreasonable use, negligence, improper service or other causes not arising out of defects in material or workmanship.

**HOW TO RECEIVE SERVICE FROM THE TIGER ELECTRONICS, INC., REPAIR CENTER FOR YOUR LIGHTS OUT GAME DURING AND AFTER THE 90-DAY WARRANTY PERIOD.** During the 90-day warranty period, you may have a defective Lights Out replaced at the dealer from which it was purchased. If, however, during the 90-day warranty period, you choose to obtain repair or replacement from the TIGER ELECTRONIC TOYS REPAIR CENTER, please make the arrangements described below:

- 1) Pack the Lights Out carefully in a sturdy box with plenty of newspaper, foam or other padding and tape closed securely.
- 2) Carefully print on the box or carton the following name and address  
**TIGER ELECTRONIC TOYS, REPAIR CENTER**  
**980 Woodlands Parkway, Vernon Hills, Illinois 60061, USA.**  
Also, don't forget to show your return address.
- 3) Put parcel post stamps on the package; insure the package, then mail.

After the 90-day warranty period and up to one year from the date of purchase, do all of the above PLUS enclose your check or money order for US\$12.50 payment for the repair service.
