

Sand Works™

Instructions

1047

In the sandbox or on the beach, Sand Works is the toy that keeps the fun in motion! It's a snap to assemble and easy to operate, with sand-activated spinning and spilling features!

1-800-PLAYSKL

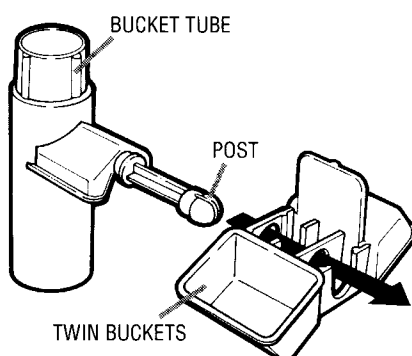

For future reference, our toll-free consumer service number is also located on this product.

Includes base, paddle wheel, paddle wheel tube, twin buckets, bucket tube, funnel, valve and shovel.

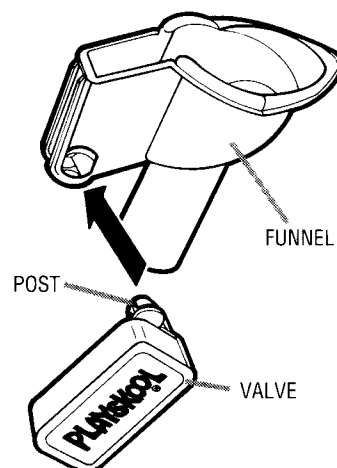

ASSEMBLY

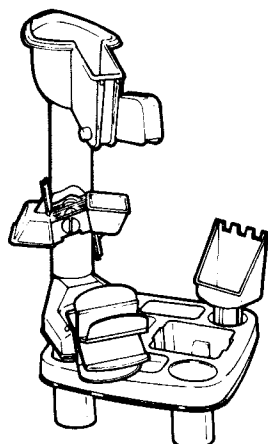

1. Align posts on paddle wheel with slots on paddle wheel tube and snap posts into place.

2. Push post on bucket tube through holes on twin buckets until post snaps into place.

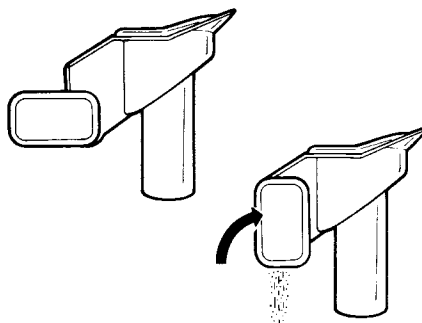

3. Push valve post through larger hole in funnel, then through other funnel hole until post snaps into place.

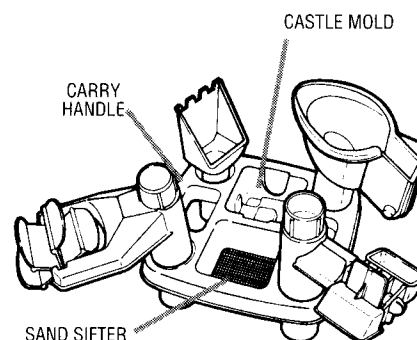

To build a Sand Works tower, stack the paddle wheel and bucket tubes—in any order—then place the funnel on top (see front of package for a good example). Tubes will fit into any circular base hole.

PLAY FEATURES

FUNNEL

Fill it to the top with sand, then flip up the valve to let the sand pour out. Or, detach it and use it to scoop sand!

BASE

Make a sandcastle or sift sand with the base. All pieces store in the base, which features a carry handle for take-along play. Scoop sand with the easy-to-grasp shovel. Pour a stream of sand out of the hole in the handle to activate the spinning and dumping features.

IMPORTANT: WET SAND WILL NOT FLOW THROUGH THE PIECES.
