HOW TO PUT SHAPE WORKS BACK TOGETHER

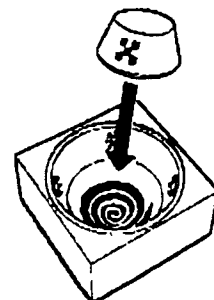

Each piece has symbols on it to help you put Shape Works back together correctly. The pieces correctly fit together with any combination of colors.

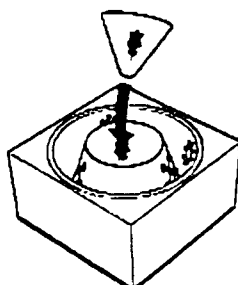

1. Place dish shape in half-cube, matching polka dot symbols on each piece.

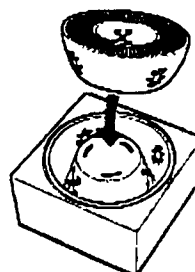

2. Place cylinder in cube, matching whirlpool symbol on cylinder's smaller rim to same symbol on outside rim of dish shape.

3. Place dome in dish shape, matching spiral symbol on dome with same symbol on dish shape.

4. Place cone in dome, matching sun symbol on cone with matching symbol on inside of dome.

5. Place doughnut shape around dome: Match checkerboard symbol on inner ring of doughnut shape with same symbol on outside of dome, or match flower symbol on outside of doughnut shape with same symbol on cylinder rim.

6. Repeat steps 1-5 for other half-cube and remaining pieces.

3 & up**

PRESCHOOL ACTIVITIES

Stacking & Nesting

Kids can stack and nest the pieces in lots of ways, to build towers and enjoy put-and-take play. These open-ended activities encourage them to use their imaginations and explore the different relationships between the pieces.

Matching & Sorting

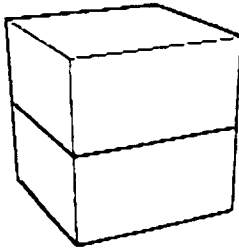

Kids can match and sort the pieces, which helps them recognize and identify colors, shapes and sizes.

Hide-And-Seek

Kids love to hide smaller pieces in larger pieces and play "peek-a-boo, where are you?" games.

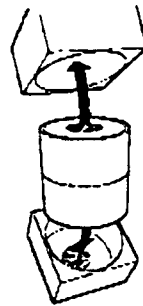

HOW TO PERFORM THE "MAGIC"

All the pieces must be correctly placed in the half-cubes before beginning.

1. MAKE A CUBE

Place one half-cube on top of other half-cube, so that "insides" face each other. Now it's a cube!

2. MAKE A CYLINDER

Remove top half-cube piece. Turn the whole thing over, and remove other half-cube piece. Now it's a cylinder!

3. MAKE A HALF-SPHERE

Make sure top half of cylinder and bottom half of cylinder are aligned. Remove top half of cylinder. A half-sphere appears! To switch colors, replace top half of cylinder, flip whole cylinder over, and remove top of half cylinder. The sphere has new colors!

4. MAKE A CONE

Replace top half of cylinder. Remove whole cylinder. A cone appears! To switch colors, replace whole cylinder and flip it over. Remove whole cylinder -- the cone has new colors!

5. MAKE A WHOLE SPHERE

Replace whole cylinder over cone. Remove top half of cylinder. Rotate half-sphere sideways and remove it from bottom half of cylinder. It's a whole sphere!

NOTE: You can switch pieces from one half-cube to the other half-cube, to change the colors of the shapes you reveal, for new surprises each time!
