

STAR
WARS

Object

To score as many points as possible by destroying a relentless swarm of IMPERIAL TIE FIGHTERS, a barrage of deadly fireballs, and a maze of sinister laser towers before finally blasting the infamous DEATH STAR from existence.

Setting the Console Controls

1. Place the cartridge firmly into the cartridge slot at the back of the Commodore unit.
2. Turn the ON/OFF switch on ON.
3. After a brief delay, the game title will appear on the screen. To select WAVE (difficulty level) 1, 2, or 3, press the RESTORE key.
4. Then, press the FIRE button on the joystick controller to start the action.

The Joystick Controller

Because this is a one-player game, plug the joystick controller into the jack labelled "1."

The joystick operates much like the flight controls of an X-WING FIGHTER. To gain altitude (fly upwards), pull BACKWARDS on the joystick. To dive (fly downwards), push FORWARDS on the joystick. To fly left or right, simply move the joystick in those directions.

To fire your PROTON TORPEDOES, simply press the FIRE button on the joystick controller. Holding the FIRE button will not produce rapid fire succession.

Pause Feature

At any time during the game, you may "freeze" the action on the screen by pressing the RUN/STOP key once. To start the action again, simply press the FIRE button on the joystick controller or the space bar on the console.

Playing

In this game, there are many WAVES of increasing difficulty. Each WAVE features 3 Rounds (except for WAVE 1). The rounds involve: (1) destroying fireballs and shooting down TIE FIGHTERS patrolling the DEATH STAR, (2) blasting fireballs and the tops off of LASER TOWERS along the surface of the DEATH STAR, and (3) destroying fireballs while avoiding CATWALKS in the DEATH STAR's EQUATORIAL TRENCH. It is in this last round that you must also hit the MAIN REACTOR PORT on the floor of the TRENCH with a PROTON TORPEDO to destroy the DEATH STAR completely!

You'll begin the game at Round 1 (WAVE 1, 2, or 3) with 9 energy shields. Each time you successfully complete a WAVE, you'll automatically advance to the next and more difficult one with your remaining number of energy shields—plus 3 additional energy shields (NOTE: the maximum number of energy shields you can have at one time is 9). When you lose all 9 energy shields, and are hit by a fireball, tower, or CATWALK, the game ends and you must begin again: MAY THE FORCE BE WITH YOU."

Shooting Imperial Tie Fighters

Round #1

The IMPERIAL FLEET approaches! Their mission—to protect the DEATH STAR at all costs. These TIE FIGHTERS are armed with deadly fireballs. It's up to you to blast as many TIE FIGHTERS and fireballs as possible in order to gain the most points. Each time a fireball impacts your ship, you lose 1 energy shield.

Survive this round and advance to the next one with your remaining number of energy shields.

Blasting Laser Towers

Round #2

You've made it past the IMPERIAL FLEET and now you're streaking across the surface of the DEATH STAR. Suddenly, you're caught in a maze of sinister-looking LASER TOWERS that rise into the darkness of space. You'll have to do some fancy flying if you're to avoid hitting them with your X-WING FIGHTER. Set your sights on the tops of these towers as you fly by and try to blast them with your TORPEDOES. For each tower top you hit, you gain extra points.

And by the way, keep an eye open for those deadly fireballs. They're still out there (and after your ship!) Destroy them for extra points, too. Each time a fireball hits your ship, or you hit a tower, you lose 1 energy shield.

Survive this round and advance to the next one with your remaining number of energy shields.

Surviving the Equatorial Trench

Round #3

Beyond the LASER TOWERS lies the DEATH STAR's EQUATORIAL TRENCH. Once you're in it, get ready to fly like you've never flown before! As if the attacking fireballs aren't enough, there are all sorts of CATWALKS to avoid as you speed through this narrow passageway. Fly over, under, and around them--just don't hit them. Each time you do, or if you're hit by a fireball, you lose an ENERGY SHIELD. Destroy as many fireballs along the way for extra points or, better yet, USE THE FORCE!"

When you've made it past all these CATWALKS, keep an eye on the TRENCH's floor. When you see the MAIN REACTOR PORT, let the PROTON TORPEDOES fly. Make a direct hit and DEATH STAR explodes! The REBEL BASE is once again safe from the forces of the EMPIRE.

Survive this round and advance to the next WAVE with your remaining number of energy shields--plus bonus shields.

End of Wave

Each WAVE ends when you successfully complete all 3 rounds.

Wave Selection & Progression

After turning the game unit ON, you may select WAVES 1 through 3 to begin playing by pressing the RESTORE key. The WAVE number will appear in the upper, right-hand side of the screen. You cannot select WAVES 4 and up; you must survive WAVE 3 to advance to WAVE 4, and so on.
