

SUPERION™ INSTRUCTIONS

After you have collected the other four Aerialbot™ team members, connect them with Silverbolt to form the Mighty Superion! Before assembling Superion, convert all five Aerialbots into their robot modes.

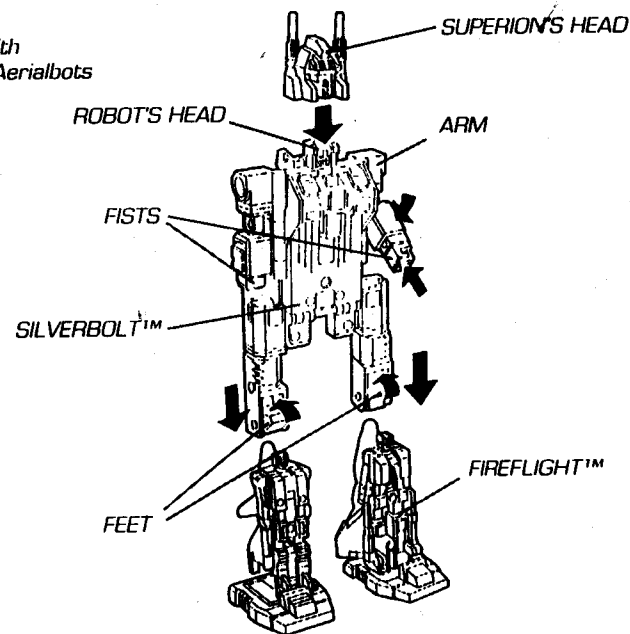

STEP 1

To form Superion's right leg, fold SLINGSHOT'S arms down to the sides and push legs up into body. Insert post on right foot stand into hole under Slingshot's legs. Repeat instructions for FIREFLIGHT™ to form left leg.

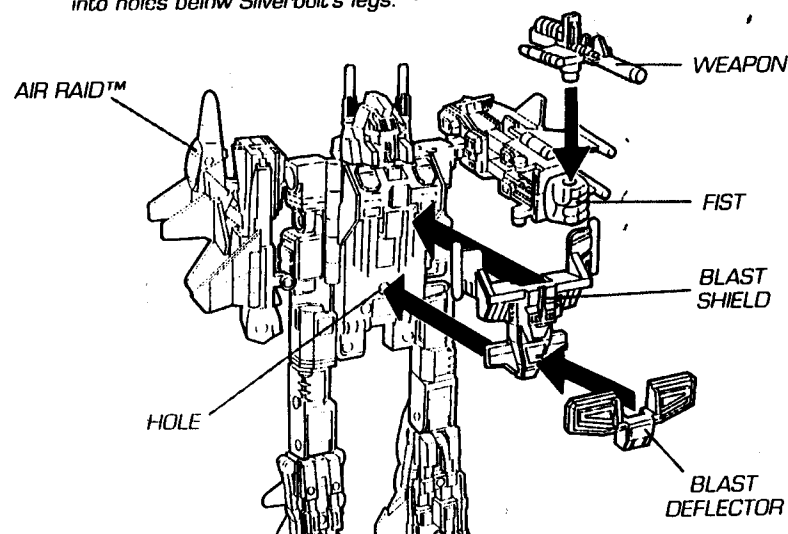

STEP 3

To form Superion's left arm, fold SKYDIVE'S arms down to the sides and pull out shoulder connector. Insert post on left fist into Skydive's arm hole and insert shoulder connector into hole in Superion's left shoulder. Repeat instructions with AIR RAID™ to form right arm.

STEP 2

To form Superion's main body, push in SILVERBOLT'S fists and swing arms straight down. Fit Superion's head over Silverbolt's head and fold up robot feet. Insert heads of Slingshot™ and Fireflight™ into holes below Silverbolt's legs.

FINISH

Insert post on blast shield into hole in body as shown. Fit blast deflector over blast shield and rotate arms up. Insert post on weapon into hole in fist.

Aerialbots are interchangeable and can form any arm or leg of Superion!
