

PRO SPEED™

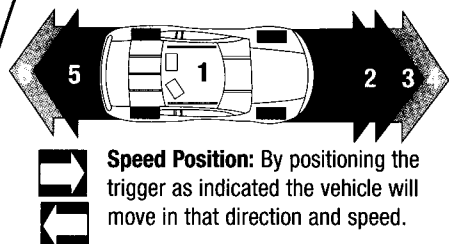

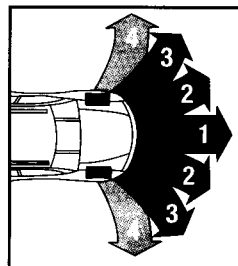

Tricks and Stunts

Here are a few of the exciting tricks and stunts you can do. They take practice and skill, attempt simple skill level tricks before going on to more advanced tricks. **Remember you will need to practice to achieve these skills.**

Controller Unit

Steering Position: By turning the steering knob in the position indicated the vehicle will turn in that direction.

Speed Position: By positioning the trigger as indicated the vehicle will move in that direction and speed.

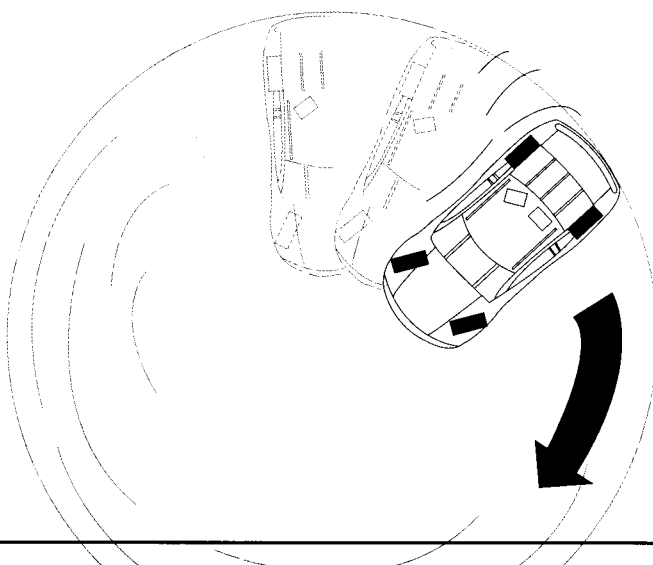

SIMPLE SKILL LEVEL - Donut

Steering Position 4 Right or 4 Left

Speed Position 4

DONUT

Beginning at a stopped position, steer hard right or hard left. Apply full forward power. Hold these settings and the vehicle will perform a series of donuts.

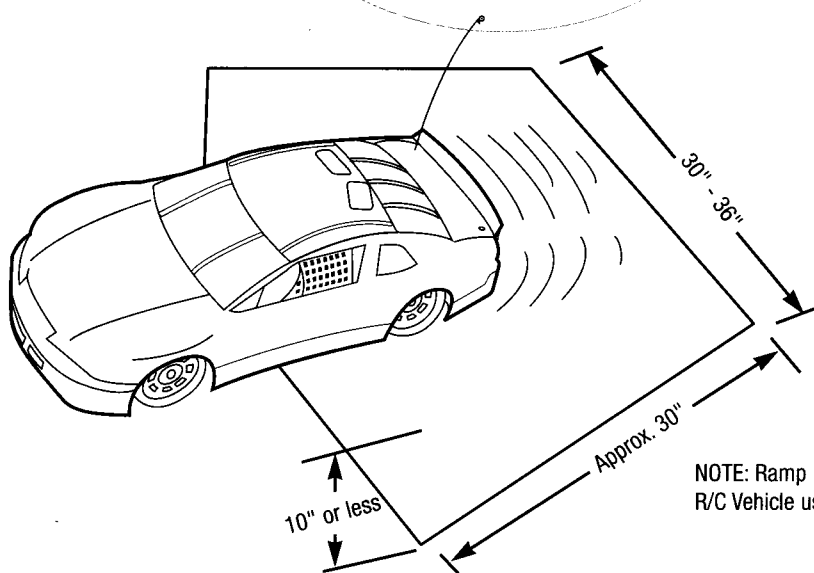

MODERATE SKILL LEVEL - Ramp Jump

Steering Position 1

Speed Position 4

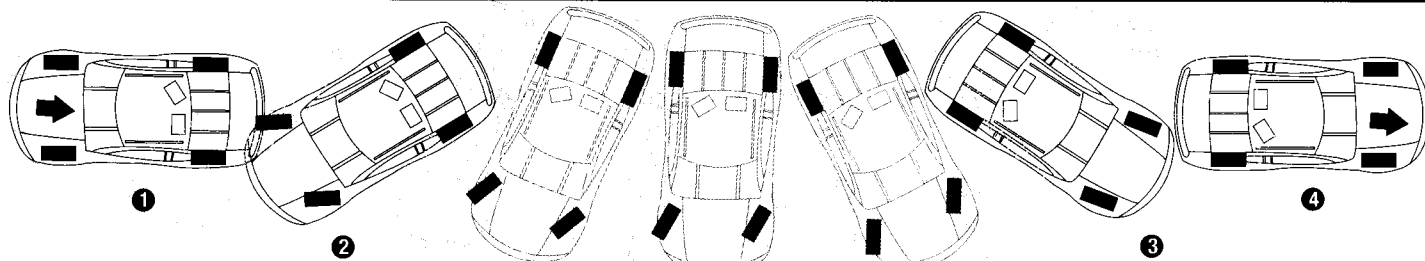

RAMP JUMP

Once you have built your own ramp, drive vehicle in a straight line, full speed at the ramp. The vehicle will jump the ramp. Super Speed switch should be used, however, you may practice with the Super Speed switch in the beginner position. Recommended width of ramp is 30" to 36", 30" long and no higher than 10".

NOTE: Ramp intended for R/C Vehicle use ONLY.

MODERATE SKILL LEVEL - Reversal

1 **Steering Position 1**
Speed Position 6
Accelerate to full speed in reverse. You must have the Super Speed switch in expert position.

2 **Steering Position 4 Right**
Speed Position 1
Release throttle and steer the vehicle hard right. The vehicle will reverse as shown.

3 **Steering Position 3 Left**
Speed Position 3
Accelerate to Medium Speed while steering midway left.

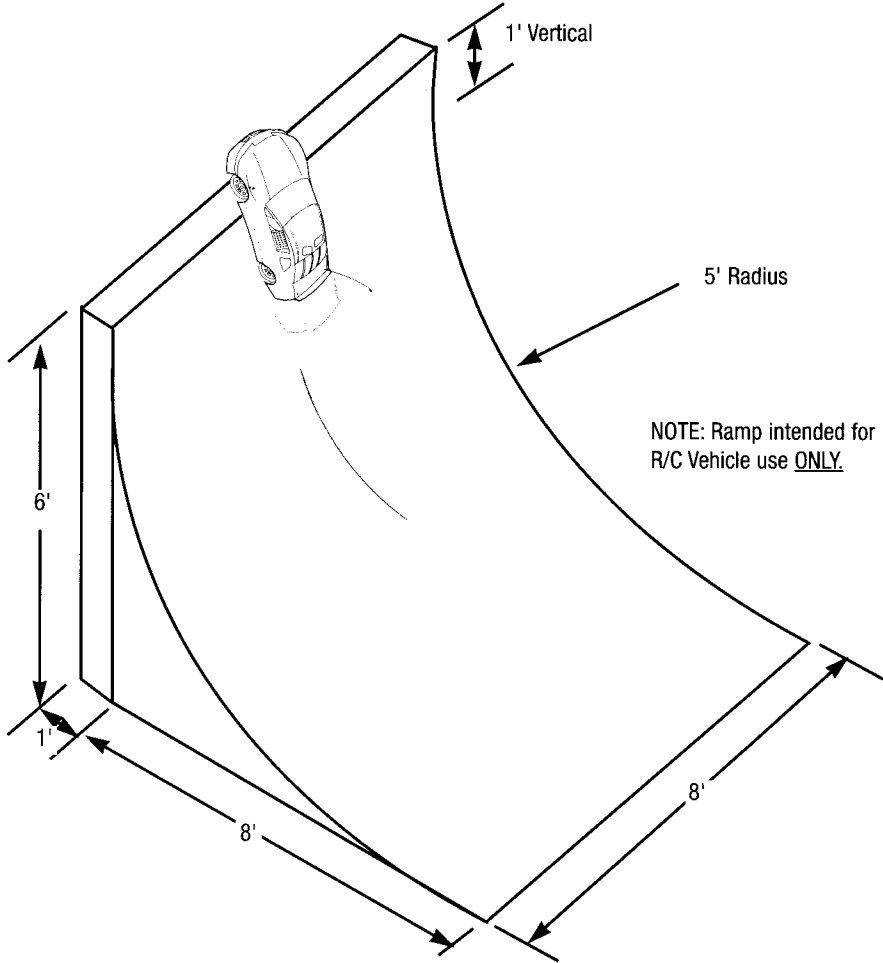

4 **Steering Position 1**
Speed Position 4
As vehicle straightens out, release steering knob to go straight, accelerate full power.

EXPERT SKILL LEVEL - Quarter Pipe

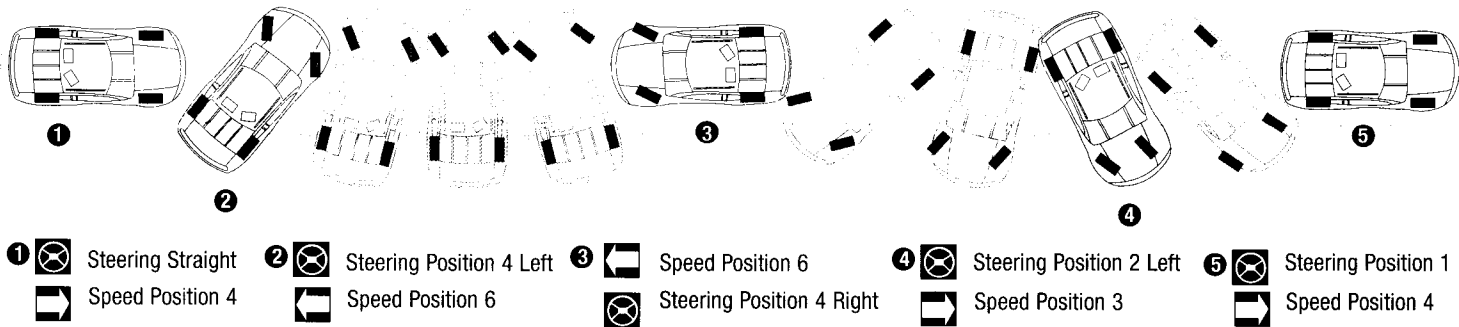

-  Steering Position 1
-  Speed Position 4

QUARTER PIPE

Once you have built your own ramp, drive vehicle in a straight line toward the ramp. The vehicle will “jump” the ramp. Super Speed switch could be used, however, you should practice with the Super Speed switch in the beginner position. Recommended width of ramp is 8', 8' long and no higher than 6'.

EXPERT SKILL LEVEL - 360° Spin

Accelerate to full speed forward. Throw vehicle into reverse at medium speed turning hard left. As vehicle turns 180° turn hard right. As vehicle completes a circle, straighten the wheels and accelerate away. Practice your timing...the trick is easiest to do on a smooth surface.

Oval Track Racing - Great racing with a 27mhz against a 49mhz Pro Speed™ Vehicle.
Learn and practice with the Super Speed switch in the beginner position, race with switch in expert position.
