

Haunted House

Here is a useful tip before you get started!
For best results, print patterns onto cardstock or glue onto cardboard.

1. Using a color printer, print the haunted house template onto 8.5" x 11" paper. You can also print extra fencing if desired.

2. Cut out the house along the outside.

3. Score and fold on dashed line to create support tabs.

4. Fold both tabs back and place house on flat surface.

CREATIVE TIP: To make your Haunted House playset more sturdy, you can add extra fencing or even put a PLAY-DOH can in back of the house for support.
