

HOW TO PLAY

- 1 Find a pole or stick and tie a string to one end. Then tie a crayon or popsicle stick to the other end of the string.
- 2 Fold a strip of tape over onto itself so it makes a ring with the sticky side out. Attach this to the bottom of the crayon or popsicle stick.
- 3 Cut out the fish and other denizens of the deep and arrange them on the floor. If you're beginners, arrange the fish close to you. If you're experts, use a longer string and put the fish a few feet away. You might even want to pretend your couch or bed is a boat and cast your line from there!
- 4 Start fishing! Each player gets five casts to catch some fish (or whatever else is swimming around out there). After five casts, add up your score. Give yourself half points for anything you hook and full points for everything you reel in.
