

# Yahtzee®

AGES  
8+

## Virtual Rules

### WHAT YOU'LL NEED:

You can play Yahtzee with a total of 2 or more players over video chat! All players will need a copy of Yahtzee (with dice and scorepads), and a pen or pencil.

#### AMP UP THE FUN OVER VIDEO CHAT:

If you have a boxed version of Yahtzee, you may choose to turn your Yahtzee box into a stand for your phone to stream your dice rolls and score sheet using the steps below:

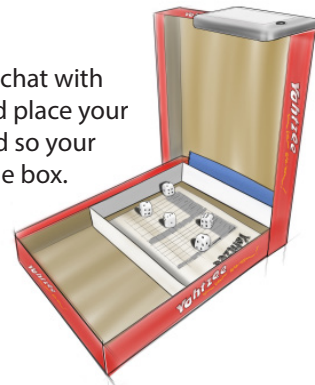

- 1)**  
Place the bottom box inside the lid and secure with a piece of tape.

- 2)**  
Place the tray (or a white piece of paper) inside the bottom, closest to the side with tape.

- 3)**  
Join your video chat with your phone, and place your phone on the lid so your party can see the box.

### HOW TO PLAY:

#### TO BEGIN

- Roll a die to see who starts, and determine play order. (We recommend alphabetical order).
- Write each player's name on the score card, in the order of play.

#### ON YOUR TURN

- Roll **up to** 3 times each turn. Remember to showcase your rolls on camera!

##### YOUR 1<sup>ST</sup> ROLL

- Roll all 5 dice. If you get the exact combo you want, mark your score card right away.

##### YOUR 2<sup>ND</sup> ROLL

- Set aside any 'keepers' and re-roll the rest.
- If you get the exact combo you need, mark your score card.

##### YOUR 3<sup>RD</sup> AND FINAL ROLL

If you still haven't nailed a combo, or just want to maximize your score:

- Roll some or all of your dice (as above), even any 'keepers' you might have set aside.
- You must enter a score at the end of this roll, whether or not you like your dice!
- If your roll doesn't suit any of your empty boxes, you have to enter a ZERO somewhere.
- BUT scoring even a single die value is better than a ZERO! See the full instructions for SCORING.

- Fill in one empty box in the column under your name each turn.

#### WIN:

The player with the highest score after 13 rounds wins the game!

For a more detailed description of gameplay, please check out the full instructions!
