

# NERF

# RIVAL

PRECISION BATTLING

Q: Are the tactical rails on Nerf Rival blasters compatible with Nerf accessories or airsoft/paintball accessories?

A: Technically, neither. Rival products are not specifically designed for and are not intended for use with Nerf accessories or traditional airsoft/paintball accessories. We therefore do not recommend that you use either Nerf accessories or airsoft/paintball accessories with Rival products. Nerf Rival will be launching its own line of compatible accessories in the future.

Q: What should I know about the Apollo XV-700?

A: This blaster features a spring-piston mechanism that propels the ball out of the blaster at a high velocity. To operate, first ensure the trigger lock is disengaged. When operating the blaster, be sure to pull the cocking handle all the way back and all the way forward before pulling the trigger. Although this blaster is not motorized, you find that it is just as powerful as the motorized counterpart, Zeus!

For best results, do not store foam rounds inside the blaster for long periods of time.

This blaster is also compatible with Rival's 12-round magazine.

Q: Can you speak to the safety of Nerf Rival products? Is protective eyewear necessary?

A: We embrace NERF in its truest form and encourage you to do the same. Safety and responsible play are of utmost concern to the NERF team. Our products meet or exceed all applicable laws, regulations, and standards. Users should always act and play responsibly, should only use the foam balls designed for NERF RIVAL blasters, and should never modify any NERF products.

Eye protection is recommended, but not required for use with Nerf Rival products.

Q: Where can I get more foam rounds?

A: Various retailers carry refills of the Rival brand's yellow foam round balls:

Q: What should I know about the Zeus MXV-1200?

A: This blaster features a spinning wheels mechanism that propels the ball out of the blaster at a high velocity. When operating the blaster, be sure to release the trigger lock and ensure the magazine has been snapped into place. To ensure maximum performance, check to make sure batteries are fresh and correctly put into place inside the battery tray.

For best results, do not store foam rounds inside the blaster for long periods of time.

This blaster is not compatible with Rival's 7-round magazine. If you find that you have encountered what seems like a jammed ball, please try the following troubleshooting steps:

- (1) Move trigger lock down to lock trigger.
- (2) Remove magazine.
- (3) Open jam clearing door.
- (4) Push round out.
- (5) Remove any other rounds in blaster.
- (6) Close jam clearing door.
- (7) Replace magazine.
- (8) Move trigger lock up to unlock trigger.
- (9) Resume play.

Q: How do I contact customer service?

A: If you have a question about your Nerf Rival product, you can contact someone on our Customer Service team at 800-255-5516, Monday-Thursday 8:00am-5:00pm EDT and Friday 8:00am-1:00pm EDT.
