Baking Basics

1. Place the baking pan in the baking slot as shown.

2. Use pan pusher to push pan into baking chamber. Stop when the baking line on the handle lines up with the bottom edge of baking slot as shown. Do not use your hands to push pan in. Do not leave pan tool in oven.

   Look inside the oven to make sure the metal doors are closed on both sides. If one door is slightly open, use the pan tool to push it shut. If the pan is sticking out on the other side, you’ll need to push the pan all the way through (Step 3), take it out (Step 4) and start again (Step 1).

3. When baking time is done, use pan pusher to push pan all the way through to cooling chamber. Be careful - pan is hot! Allow pan to cool in the cooling chamber for 5 minutes.

4. When cooling time is done, use the spatula to remove the pan from the oven.

5. Turn off oven and unplug when finished baking. Wait for oven to cool, then wipe clean with a damp cloth.

Follow all instructions carefully to get the best results, and have fun!
