Art-Tube

Finger Paint Set

Finger Painting

Finger Painting

is a fascinating method of art. You do not have to know how to draw or be an artist in order to obtain beautiful results.

INSTRUCTIONS

Necessary Equipment

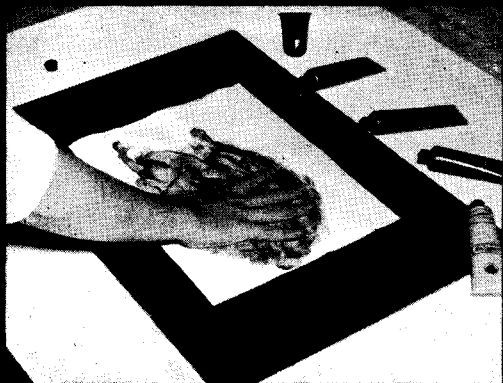

In addition to your ART TUBE FINGER PAINT SET, you will need a cloth to wipe your hands or parts of the picture, and newspaper or cardboard to place finished paintings on to dry. Due to the long working qualities of the new Tube Finger Paint, you will find that *adding water is not necessary*.

Preparation

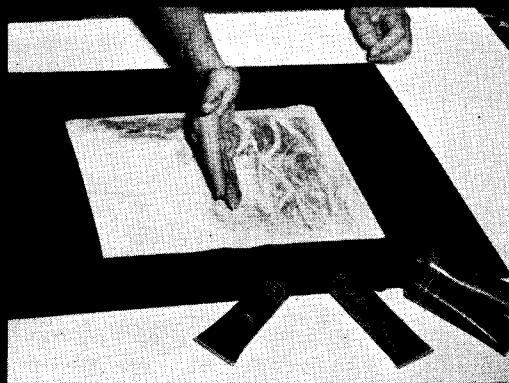

Roll a sheet of the special glazed Finger Paint paper so that the glazed side is on the inside. Completely submerge the roll in water and then, holding it by the edges, unroll it slowly as you draw it from the water. Allow excess water to drain off and place the wet paper on the table with the glazed side up and gently smooth out the wrinkles.

Start of Picture

Select a color that you would like to use to start your painting. Squeeze the tube gently until you have the desired amount of paint on the wet paper. With your whole hand, work the color on the paper in a circular motion until you have the desired start for your painting.

Using upward stroke with the side of the hand

Adding Color

New color may be blended into the base or starting color by adding one color on top of the other. If a pure color is desired in painting, simply wipe out background with a paint cloth or fingers and add the new color.

Helpful Hints for Finger Painting

You will find different designs in Finger Painting are obtained by various movements of the fingers, hands, arms, finger nails, and knuckles. A standing position while Finger Painting is best as it allows for freedom of motion. It is better not to plan details of your paintings but to let them develop as you work with the paint.

Finishing Picture

When the painting is finished, carefully place it face-up on a newspaper or cardboard to dry. When it is dry, apply a warm iron to the back of the picture to remove the wrinkles. If you would like to preserve your painting, apply a light coat of Lacquer or Shellac.

It is fun to make paintings and then use them to decorate different items, such as waste paper baskets, boxes, lamp shades, etc. Cut the painting to fit the object and glue in place. The different photographic illustrations show some of the many strokes used in FINGER PAINTING.

Finger being used for finer work

Finger nails are used for detail

Art Tube Finger Paint is made from the finest materials

The paint is harmless and odorless. It can easily be removed from hands, clothing, or any surface by applying water.

Finger Paint in tubes lasts longer, does not dry out, and has smooth working qualities.
