## DIRECTIONS FOR PLAYING

**EXPLANATION.** The pack of Fortune Telling Cards consists of 24 cards.

Each card contains on the back 24 lines of reading matter. Before each line stands a number; and the cards are so arranged that when four cards of a set are placed in a row, side by side, there will be one line (and one only) where the numbers 1, 2, 3 and 4 will run in consecutive order from the left across all four cards.

**DIRECTIONS.** Mix or shuffle the cards thoroughly. Let the person whose fortune is to be told cut the cards. Take one at a time from the top of the pack, and arrange them in the following order on the table, placing them picture side up:

- First Row, which tells the Past.
- Second Row, which tells the Present.
- Third Row, which tells the Future.
- Fourth Row, which refers to Love Matters.
- Fifth Row, which gives General Advice.
- Sixth Row, which warns against Danger.

**CAUTION.** Do not sort the cards, but after shuffling draw one card at a time from the top of the pack. If it relates to the Past, place it in the first row; if it reads Danger, place it in the sixth row, and so on until all the cards are drawn and all six rows are filled up.

To tell the fortunes, after the cards have been drawn and placed in the above manner, **TURN** the Cards of the first row over, and find the line on each where the numbers 1, 2, 3 and 4 run in consecutive order across the cards, and these lines will tell the Past fortune. The Present fortune is told by turning the second row in the same manner, and so on with the Future, etc.

Each set of cards is capable of twenty-four combinations, by altering their arrangements in the row.
