SET UP
For best results, play with Chipky-Chi on a smooth, flat surface. Make certain the area is clear of obstacles so Chipky-Chi can flap and move freely. Chipky-Chi should be played with indoors.

CHIPKY-CHI'S SENSORS
Just like a real bird, Chipky-Chi is very unpredictable. Activate one of his sensors to see what he will do! Chipky-Chi has five sensors: a light sensor, sound sensor, and a touch sensor. He also has a magnetic sensor that allows him to react to his own feed toy, which will be described in the Corn Feed Toy section, and an infrared sensor that enables Chipky-Chi to play with other Robo-Chi™ Pets. This function is demonstrated in the Communicating with other Chipky-Chi’s and Robo-Chi™ Pets section of this guide.

To activate the Light sensor:
- Wait until Chipky-Chi stops moving.
- Slowly pass your hand over the top of Chipky-Chi's nose (2 holes at the top of the nose). When you move your hand away, Chipky-Chi will respond.

To activate the Sound sensor:
- Wait until Chipky-Chi stops moving.
- Clap your hands or make a loud noise. Chipky-Chi will respond.

To activate the Touch sensor (hair on Chipky-Chi’s head):
- Wait until Chipky-Chi stops moving.
- Gently press the hair on top of Chipky-Chi’s head. If you press his hair once, Chipky-Chi will respond, press twice and see what Chipky-Chi will do. You can press his hair up to 5 times and Chipky-Chi will respond in many different ways! Many of Chipky-Chi’s responses are affected by his bio-rhythms, the more you play with him, the happier he will be!

CHIPKY-CHI’S EYES
Chipky-Chi’s eyes are very expressive; they will help you to know whether Chipky-Chi is very happy, happy, normal, sad, or feeling.

CHIPKY-CHI’S BIO-RHYTHM
Graphs shown below represent the 8 bio-rhythms of Chipky-Chi. Each level lasts about 30 minutes and determines Chipky-Chi’s mood and behaviors. For example, when Chipky-Chi is in level 1, he will be unhappy almost all the time and will have sad eyes. In level 8 Chipky-Chi will be happy almost all the time and will sing one of over 40 songs that he sings!

CAUTION:
- As with all small batteries, the batteries used with this toy should be kept away from small children who still put things in their mouths.
- If they are swallowed, promptly see a doctor and have the doctor phone (202) 625-3333 collect.
- Make sure the batteries are inserted correctly and follow the toy and battery manufacturers’ instructions.
EAR OF CORN FEED TOY
Chirpy-Chi loves to be caressed, and loves to eat his Ear of Corn Feed Toy. Chirpy-Chi reacts to his corn toy when you wiggle it on top of his head. He will respond with happy noises and a feeding motion.
- Corn Feed Toy does not require batteries.
- Do not attempt to open corn toy.
- Avoid placing corn toy close to any magnetic-sensitive objects like cassette tapes, credit cards, videotapes, etc.
Warning: Corn feed toy is a toy, not intended for use by a live bird.

LISTEN TO A SONG
To listen to one of Chirpy-Chi's favorite songs, please follow the sequence below:
1. Wait until Chirpy-Chi stops moving.
2. Hold your hand completely over Chirpy-Chi's eyes and mouth.
3. While still holding your hand over eyes and mouth, press hair in top of his head two times quickly (press twice within 2 seconds).
4. Wait until you hear 3 beeps, then press hair on Chirpy-Chi's head from 1 to 8 times and you will hear a different song for each number of beeps.
5. After each song is completed, Chirpy-Chi will return to his normal mode. To hear another song, repeat steps 1-4.

SLEEPING
Because Chirpy-Chi sleeps as a baby bird, he needs his sleep. Chirpy-Chi will fall asleep when it is dark or when no one is playing with him. When he gets tired, Chirpy-Chi might imitation animal sounds to get your attention, or even flap his wings and make angry looks. After about 6 minutes, if he does not get anyone to play with him, Chirpy-Chi will then fall into a deep sleep.
To wake up Chirpy-Chi when he is in a deep sleep, press the hair on his head. If Chirpy-Chi was sad when he fell asleep, it might take slightly longer for him to completely wake up, so you might need to touch his head more than once. If Chirpy-Chi was happy when he fell asleep, he should wake up quickly.

COMMUNICATING WITH OTHER CHIRPY-CHI'S AND ROBO-CHI™ PETS
Chirpy-Chi loves to communicate with other Chirpy-Chi's and other Robo-Chi Pets. To begin communication, please follow the sequence below:
1. Place the two Robo-Chi Pets facing each other approximately 6" to 12" apart.
2. Wait for both to stop moving.
3. Press the touch sensors on BOTH PETS at the SAME TIME.
4. Each should start speaking, if they are happy at the same time, they will sing a song together, if they are unhappy with each other, they might speak unhappily with each other and could even refuse to sing.
5. Chirpy-Chi and other Robo-Chi Pets will automatically return to normal play mode after communicating for approximately 3 minutes.
If you want them to communicate again, please repeat steps 1-3.

CHIRPY-CHI REASSEMBLY
Chirpy-Chi's wings, tail and legs are designed to be re-attached if they become detached. To reassemble, simply align notches of unattached piece with appropriate hinge, as shown below.

RESET
Press reset button only if Chirpy-Chi's movements seem erratic or if it seems to be malfunctioning.
To reset Chirpy-Chi, use a ball point pen or thin straight object (like a straightened paper clip) to press reset button located on the right side of Chirpy-Chi.

CLEANING INSTRUCTIONS
High temperature will always destroy the unit. Do not leave unit in direct sunlight.
Clean only with a piece of soft dry cloth.

TROUBLESHOOTING
Chirpy-Chi is designed to provide hours of fun. If Chirpy-Chi becomes erratic and you are having trouble, check to make certain that Chirpy-Chi has fresh batteries and then call Tiger Electronics Customer Service Department at 1-800-323-9732.
If your Chirpy-Chi has no ears, it may be asked, "Sleeping?" Check to make certain there is no fresh batteries.
If you can't wake up Chirpy-Chi by pressing the head sensor, please check to see if Chirpy-Chi was asleep and when he fell asleep, it may take multiple presses to wake up Chirpy-Chi.

TAKE CARE OF YOUR CHIRPY-CHI

Some states do not allow limitations as to how long an implied warranty lasts and/or exclusions or limitations of incidental or consequential damages, so the above limitations and exclusions may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
