

INSTRUCTIONS

1. TWO GREAT WAYS TO WIN!

Welcome to the greatest slots game you've ever held in your hand. Unlike other slots games, there are **TWO** great ways to win. Win on the center payout line **AND** win on the Wheel of Fortune wheel! Whenever you roll a SPIN icon on the center payout line, you're given a free spin on the Wheel! If you roll two SPIN icons, then you get two spins on the Wheel! Roll three SPIN icons, then you get three spins on the Wheel!

2. IT TALKS!

Your Wheel of Fortune slots even talks to you! It tells you to "Place your bets!" with one, two, or three coins! When you roll a SPIN icon, the voice will tell you to "Spin the Wheel!"

3. PROGRESSIVE SUPER JACKPOT

The **PROGRESSIVE SUPER JACKPOT** screen starts at \$5000 when play begins. However, whenever a player loses money, the lost money automatically is added to the super jackpot.

There are two ways to win the **SUPER JACKPOT**:

- If a player rolls three Wheel of Fortune symbols on the regular payout line with 3 coins played, they win the progressive (**SUPER JACKPOT!**)
- If player spins the Wheel of Fortune Wheel and spins the Super Jackpot symbol, they also win the super jackpot!

When the Super Jackpot is won, the on-screen super jackpot resets at \$5,000.

4. PAYOUT CHART

The amounts won on the payout line are determined based on the symbols and the number of coins bet: 1 coin, 2 coins or 3 coins. (You also win money each time you roll a SPIN icon and get to spin the wheel!)

	1 COIN	2 COINS	3 COINS
3 Wheel of Fortune icons			
SUPER JACKPOT! (Progressive!)	2000	4000	5000
Blue Diamonds	1000	2000	3000
"7's"	100	200	300
3 Single Bars	10	20	30
3 Spins	5	10	15
2 Single Bars and 1 Spin icon	5	10	15
2 Spin icons	2	4	6

Remember that in addition to the coins won when player rolls a SPIN icon, they also get to spin the Wheel of Fortune wheel for additional money!

5. FASTER PLAY

For players desiring faster play, the game has a special **MAX BET** feature. With the press of a single button, the player can place the maximum bet and play the slots. See "How to Play" below.

6. HOW TO PLAY

ON/OFF

- to turn on the unit.
- to turn off the unit.

SOUND

- to toggle the sound: on/off

BET

- to bet a coin. Each press of the button will bet another coin, up to a maximum of 3 coins.

MAX BET

- to bet the maximum amount (3 coins). This will spin the symbols along the payout line automatically.

SLOT SPIN

- to spin the reels along the payout line (after placing your bet).

WOF SPIN

- to spin the Wheel of Fortune wheel (if you acquire one or more SPIN icons on the payout line).

MAX SCORE

- to view the maximum score achieved on the unit.
- to see the amount accumulated in the super jackpot.

RESET

- to reset the unit if the game malfunctions.

Press the **ON** button to turn on the unit. On screen will appear your current score and the number of dollars accumulated in the jackpot. If this is the first time you are playing, you begin play with \$200 and with \$5000 in the super jackpot.

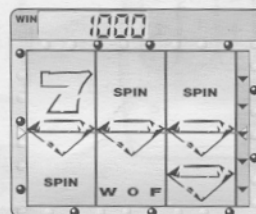

A voice will call out, "PLACE YOUR BETS!"

Press the **BET** button to place your bet from 1 to 3 coins. Each time you press the **BET** button, 1 coin will "drop" into the slots! If you make a mistake (before pressing **SPIN**), just press **BET** until the amount you want to bet appears.

When you have placed your bet, press the **SLOT SPIN** to get the reels along the payout line rolling!

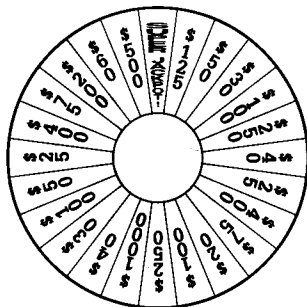

For faster (and riskier!) play, you can press the **MAX BET** button instead of the **BET** button. You are now automatically betting the maximum amount of 3 coins and spinning the reels along the payout line automatically, all with the single press of this button!

Once **SLOT SPIN** has been activated, you will see the symbols spinning along the payout line. When the symbols stop, look to see which symbols are lined up at the **CENTER LINE**. If any of the combinations appearing in the payout chart show up at the center line, you **WIN**.

Remember, you win based not only on winning combinations, but also on how much you bet. Check the payout chart as well as the unit itself for the exact amount!

The Wheel of Fortune Wheel:

If you happen to roll a SPIN icon on the center line of the payout line, then you will hear a voice call out, "SPIN THE WHEEL!". Now press the WOF SPIN button located on the center of the wheel — and this sets the Wheel of Fortune wheel spinning! You win the dollar amount shown on the wheel!

If one SPIN icon appears on the center line of the payout, you spin the Wheel of Fortune wheel one time. But if TWO SPIN icons appear on the center line, you spin the Wheel of Fortune wheel TWICE. If THREE SPIN icons appear on the center line, you spin the Wheel of Fortune wheel THREE times. (This is in addition to the money you automatically win based on the payout chart.)

In the Wheel of Fortune television show, the harder you spin the wheel, the longer the wheel spins. Your slots game works the same way! The longer you hold down the SPIN button, the longer the wheel will spin!

Progressive Super Jackpot:

Every time you make a bet and lose, that money is added to the super jackpot. You win the entire amount in the Super Jackpot by rolling 3 Wheel of Fortune icons on the center line of the payouts OR by spinning the Wheel of Fortune wheel and spinning the SUPER JACKPOT sign on the wheel!

You can press the **MAX SCORE** button at any time to see the maximum amount won on your slots game and the amount currently in the Super Jackpot.

When you turn off the game, the unit will remember the total amount you've won, the maximum amount won and the amount of money accumulated in the super jackpot. So when you turn the unit back on, these three factors (your winnings, the max score, and the super jackpot total) will all still be stored.

The unit shuts off automatically after 3 minutes of no action but retains your total winnings, the maximum score and the amount currently in the progressive super Jackpot!

You will lose your winnings, max score, and jackpot total whenever you change batteries in the unit or whenever you press the **RESET** button.

When you run out of money, press the **ON** button to start a new game. The game will automatically reset with you having \$200 to wager and with the Super Jackpot adjusted back to the starting level of \$5000.
